Technical Skills

Frontend: HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Angular, WebRTC, Zod
Backend: Node.js, Express, NestJS, Spring Boot, Python, Java, Socet.IO, JWT, Cookies, Proxy
Database: PostgreSQL, MongoDB, NoSQL, Prisma
DevOps: Docker, Docker Compose, GitHub

Experience

Software Engineer Air Force Materiel Command - Warner Robins, GA *June 2022 – Present*

- Worked closely with developers and product owners during sprint and PI planning, and whenever needed, to improve the application and meet customer needs.
- Mentored and helped onboard entry-level developers, guiding them in setting up their dev environment, getting comfortable with the team, and improving their coding skills.
- Wrote PostgreSQL queries to handle data operations like retrieving, creating, updating, and deleting data through the APIs.
- Developed APIs using Spring Boot and Java to process requests coming from the user interface.
- Built and worked on server APIs to handle and organize requests from different environments, including federation.
- Designed and improved user interfaces using Angular, HTML, CSS, and TypeScript to make them more responsive and user-friendly.
- Developed and maintained a real-time chat messaging application to support communication for warfighters in the field.

Computer Science Tutor - Valdosta State University - Valdosta, GA *2022 – May 2022*

Mentored CS students in programming languages, data structure, and algorithms. Delivered assistance to students succeed in quizzes and exams.

Side Projects

AnythingDoor-DoorDash Clone Github_Repo_Link

The e-commerce website to support real-time online order tracking, similar to DoorDash or Uber Eats, using the following tech stack: React, Typescript, Tailwind, Zod, Framer-Motion, Lucide, Socket.IO. Nestjs, Node.js, Rest, JWT, OAuth2 PostgreSQL, Zod, Prisma. Docker, Docker Compose, GitHub and OpenAI.

Motorcycle-Ecommerce website Github_Repo_Link

The simple website to search and order the motorcycle gears. Built by React, Tailwind CSS, JavaScript.Node.js, Express. NoSQL, MongoDB, PostgreSQL. Docker, Studio 3T. OpenAI.

App-chat

Collaborated with a teammate to develop a real-time messaging application capable of sending and receiving messages instantly, with support for group chat functionality. Built using React, WebSocket, NestJS, TypeScript, Lucide, Zod, and Framer Motion.

These applications were built in my downtime to refine and strengthen my skills.

Education

B.S. in Computer Information Systems, **Minor in Computer Science**
Valdosta State University - 2022

Certs and Additional

Top Secret and SCI Clearance, Agile Project and Delivery Management, and Advanced Python.
Dean’s List 2016 – 2022. 3rd Place, Hackathon Award 2021
